

SHORE POWER

IN EIDFJORD

Shore power for cruise ships

From the 2027 cruise season, the port of Eidfjord will offer shore power for cruise ships at Eidfjord cruise port. The shore power system is build according to the international standard for high voltage shore connections for cruise ships (ISO/IEC/IEEC 80005-1). The shore power service is owned and operated by Plug Eidfjord AS.

Bookings

Shore power should preferably be booked at the same time as berth is reserved, and no later than four weeks prior to call. All bookings must be made by contacting [Visit Eidfjord KE](#)

Pricing, terms & conditions

The current price terms and conditions for use of the shore power service is specified on [Plug's website](#). The price reflects the costs associated with operating shore power facilities and purchasing electrical power.

First call and commissioning

For first calls and commissioning, special conditions and prices apply. For any inquiries, please contact operations@plugport.no
